

RETROSEAL[®]

RetroSeal[®] split cable gland IP washer

The RetroSeal[®] split IP Ingress Protection washer offers the facility to retro-fit missing, damaged or worn washers on existing cable gland installations, without having to completely dismantle the affected cable gland.

The 2-part RetroSeal[®] Ingress Protection washer has been independently tested to IP66/IP67 and has been designed to provide a durable, secure, long-term IP seal at the equipment-to-gland interface in an easy to fit and extremely cost-effective design.

RetroSeal[®] Features

- Easy installation offering huge time & cost savings
- 3mm thick PA6 nylon, UV resistant construction
- Operating temperature -60 to +100
- Independently tested to IEC 60529 at IP66/67
- Available in various thread sizes
